Newpoint is proud to announce the addition of Newpoint Manufacturing, LP

Newpoint Manufacturing occupies a 134,000 sq ft purpose built facility and is headquartered in Orangeburg, South Carolina. Officially opened on 24th March 2008, Newpoint Manufacturing's first task was to hire and integrate 45 personnel into the Group. Certified with R, U, and S ASME stamps, Newpoint Manufacturing will support and enhance the Group's fabrication and assembly processes globally.

New Contract Treating "Partnerships" :

Two prestigious companies are among the first to partner with Newpoint Gas for contract treating. The first will receive a 60 GPM and 40 GPM amine plants that will be located in West Virginia and have been signed to a five year contract treating agreement. The second will receive a 25 GPM amine plant that will be located in Kentucky and has also signed an agreement for five years of contract treating for the removal of H₂S. Newpoint's contract treating provides plant equipment, commissioning, personnel, maintenance, repairs as well as any needed modifications. The benefits of contract treating include no capital outlay, ability to expense 100% of treating fees and guaranteed 99% run time to name a few.

Newpoint announces expansion into the Process Heating business with Newpoint Thermal, LP

We are pleased to announce that Newpoint has expanded its position in the Process Heating industry. Newpoint has hired the Sales, Engineering, Manufacturing, and Service personnel formerly of GTS Energy under the name Newpoint Thermal, LP and will be supported by the resources of The Newpoint Companies. Newpoint Thermal will supply a variety of Process Heating Systems for industrial applications. The systems will include Process Heaters either gas or oil fired, Indirect-Fired Heating Mediums, and Direct-Fired Heating applications. For a full description of all heating systems available, please visit our website at www.newpointthx.com.

Newpoint Celebrates 8 Years of Gas Treating Success

Newpoint Gas celebrated its 8th anniversary on February 25, 2008. Newpoint's insistence upon continuing a tradition of lasting customer service, has no doubt been one of the most important contributing factors to the company's success. Through innovative engineering technologies, revolutionized business strategies, and optimized manufacturing and delivery, Newpoint Gas has transformed gas treating facilities. Newpoint would like to take this opportunity to thank all customers, as well as, the staff for making the last eight years amazing. Newpoint is looking forward to the coming years.

Newpoint's Own Present at GPA 2008

Newpoint's own company President, Zane Rhodes, and VP of Process Engineering, Trey Brown, presented papers at GPA 2008. Mr. Rhodes' collaborated with Gary Trotter of OSO Oil and Gas Properties, LLC to write, "Catalytic Oxygen Removal for the Aberdeen Coal Mine Methane Project in Carbon County, Utah." Mr. Brown's paper is titled, "Gas Treating Technologies: Which Ones Should Be Used and Under What Conditions." Both papers are available for download at <http://blog.newpointgas.com>.

Russia Receives Newpoint Plant

The collaboration between Newpoint Gas and Ventech Engineers Inc. has made company history. The 150 GPM Amine Unit will become the first Newpoint plant in Russia.
